

German Society for Virology
Alexander Ploss, assistant professor of molecular biology: 2015 Loeffler-Frosch Prize

Goethe Society
Walter Hinderer, professor of German, emeritus: 2015 Golden Goethe Medal

Government of Greece
Alexander Nehamas, Edmund N. Carpenter II Class of 1943 Professor in the Humanities: 2014 *Brigadier of the Order of the Phoenix*

Government of India
Manjul Bhargava, Brandon Fradd, Class of 1983, Professor of Mathematics: 2015 *Padma Bhushan*

Indian National Science Academy
Manjul Bhargava, Brandon Fradd, Class of 1983, Professor of Mathematics: 2015 *Foreign Fellow*

International Society of Political Psychology
Tali Mendelberg, professor of politics: 2015 *David O. Sears Book Award for "The Silent Sex: Gender, Deliberation and Institutions"*

Norwegian Academy of Science and Letters
John Forbes Nash Jr., senior research mathematician: 2015 *Abel Prize*

Prince Khalid bin Sultan bin Abdulaziz
Justin Sheffield, research scholar, civil and environmental engineering: 2014 *Prince Sultan International Prize for Water*

Eric Wood, Susan Dod Brown Professor of Civil and Environmental Engineering: 2014 *Prince Sultan International Prize for Water*

Royal Swedish Academy of Sciences
Angus Deaton, Dwight D. Eisenhower Professor of Public Affairs: *Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel 2015*

University of Munich Institute for Advanced Study
Yannis Kevrekidis, Pomeroy and Betty Perry Smith Professor in Engineering: 2015 *Hans Fischer Senior Fellow*

University of Roma La Sapienza
Igor Klebanov, Eugene Higgins Professor of Physics: 2014 *Caterina Tomassoni and Felice Pietro Chisesi Prize*

JEREMIAH OSTRIKER and LYMAN PAGE receive Gruber Cosmology Prize

The 2015 Gruber Foundation Cosmology Prize has been awarded to Jeremiah Ostriker and Lyman Page for "individual and collective contributions to the study of the universe on the largest scales."

The two share the prize with John Carlstrom of the University of Chicago. Half of the \$500,000 prize went to Ostriker, while Carlstrom and Page divided the other half. Each also received a gold medal at the XXIX General Assembly of the International Astronomical Union in Honolulu, Hawaii, on Aug. 3, 2015. Ostriker is the Charles A. Young Professor of Astronomy on the Class of 1897 Foundation, Emeritus, and Page is the James S. McDonnell Distinguished University Professor in Physics.

According to the award citation, Ostriker was honored for his "groundbreaking body of work over a five-decade career," while Carlstrom and Page "have each overseen ground-based experiments providing a wealth of information about the origins and evolution of the universe. Together the theoretical and experimental work of these three scientists has contributed to, clarified and advanced today's standard cosmological model." —By Catherine Zandonella
